

DESIGN AUGMENTED REALITY (AR) APPLICATION

Company Overview

KICS is dedicated to conducting research & development activities in the fields of Artificial Intelligence and Machine Learning to improve global surveillance, mitigate crime and enhance quality of life.

Try before you buy!

Description

A mobile application that lets you place the furniture of a brand / showroom in your desired space. You turn on the app through your mobile phone's camera and select a furniture to place anywhere in your room.

Design

Decor & style in Augmented Reality

START

HELP

Benefits

- Before buying, see how the furniture would look in your room
- It enables the consumer to make well informed buying decisions anywhere, anytime
- Explore brand new ways to decorate the room
- View furniture items in your space to see how they suit your style
- It helps you to find and try products remotely

Features

- Virtual placement of furniture
- Visualization of the furniture
- Rotation & movement of the 3D models
- Placement of multiple objects
